

Solar Home - Part A: Design

Sketch a design for a home that includes solar panels, a Smart Meter, and also shows how the home connects to the Smart Grid using overhead or underground utility lines. Be sure to watch that any landscaping or other objects do not interfere with your panels or utility lines.

Solar Home - Part B: Solar Q&A

Create a series of most frequently asked questions (Q) and answers (A) for people who may be interested in buying your solar home or interested in solar energy. A few sample questions have been provided. Create answers for those questions and create three more completed Q & A blocks.

Q: What happens during extreme low-light days or at night? How does the home get enough power?

A:

Q: I like the house design, but what if I am not able to have solar panels installed? Can I still get solar power delivered to the home?

A:

Q: Does solar power cause pollution or other issues?

A:
