

Energy Source Pizza Party

Read about a source of energy in the Intermediate Energy Infobook. Cut out the slice of pizza below. On the crust, write the name of the energy source. Inside each pineapple, describe how we use the energy source. Inside each pepperoni, write a benefit/advantage of its use. Inside each pepper ring, write a problem/disadvantage of its use. Use colored pencils to lightly color in the pizza slice. Tape slices together to create classroom renewable and nonrenewable pizzas.
