

Chapter 5

Community Supply Project Handbook

CS Project Portal Reports

The CS Project Portal provides Community Supply developers reports within the CSP to manage their projects. The link to login to the CS Project Portal is: ComEd.com/CSPortal. Valid credential for access such as the UserID and password are needed to access the CS Portal.

Community Supply Project Developers can utilize the CS Project Portal to manage their project.

The following two reports are available to CS Project developers;

- ❖ CS Subscriber List
- ❖ CS Host (Credit) Report

❖ **The following reports are available to the CS Project Portal users:**

Report Name	Availability
CS Subscriber List	Daily
CS Host (Credit) Report	Monthly

❖ **CS Subscriber/Beneficiary Customer List** – Electric service accounts that are registered by the CS Project developer as a CS Subscriber

- ❖ The Subscriber list provides the Developer with a list of all the subscribers on the CS project and the report includes subscriber account number, meter number, allocation %, allocation kW, Start and End Date and Status Details.

	A	B	C	D	E	F	G
1	Account #	Meter #	Allocation(%)	Allocation(kW)	Start Date	End Date	Status Details
2	999999999	123456789	1.07	21.40			After a facility is activated, requests process daily at 3:45 PM CT. Once complete, we will provide the start date for this subscriber's allocation (credits start to accrue the date following confirmation of a successful enrollment and will appear on the subscriber's bill within the next two billing cycles).

The Community Supply Project Handbook is for training and discussion purposes.

If any conflict exists between this document and ComEd's Tariffs, the Tariffs prevail.

Chapter 5

Community Supply Project Handbook

- ❖ **CS Host (Credit) report** – Electric service accounts that are registered by the CS Project developer as a CS Subscriber
 - ❖ The CS Host (Credit) report provides the Developer with a list of all the subscribers on the CS project and the report includes name of the project, subscriber account number, pseudo number, generation start and end dates, allocation kW, allocation kWh, price per kWh, actual credit amount (ComEd supplied only), Tariff rate type and Rate description. Subscribers that are on RES (retail electric supply) supply will have the price per kWh and actual credit blank. ComEd does not know what price or dollar value the CS Credit will be for RES supplied accounts.

Green Button Connect

❖ Green Button Connect

Green Button Connect affords utility companies the means to voluntarily provide customers easy access to their electricity usage data in a secure and user-friendly electronic format. Customers can also make available retail customer usage data to a Third Party. A completed Rate Dart (Data Access and Retrieval Tenets) registration form and an online GBC Registration form is necessary when third party entities certify for the Green Button Connect process allowing access to usage data for residential customers (see link below).
