

NETWORK DESKTOP POWER MANAGEMENT WORKSHEET

January 1, 2019 through December 31, 2019

Directions: Please save a copy of this form to your computer by selecting “File/Save As” before entering text and numbers. Then fill in your information electronically and select “Save.” Note that this form requires Adobe Reader® version 11.0 to function properly. Download the most recent version of Adobe Acrobat Reader DC® at <http://get.adobe.com/reader>.

Specifications

1. Incentive is available for control of desktop computers only. Laptops, laptop stations and power controls for monitors alone do not qualify.
2. Network Desktop Power Management (NDPM) software must include:
 - Centralized server-level control of the energy management settings (local users cannot bypass the energy management settings)
 - Capability of managing power consumption for each individual desktop computer
 - Capability of measuring and verifying energy savings
3. Qualifying software must result from one of the following:
 - A new installation, where none previously existed
 - An upgrade of an operating system or other network support software where the desktop computer power management function did not previously exist
4. A copy of the software license agreement and a report generated by the NDPM software must be included with the final application. The report must include:
 - The location and number of the desktop computers that are being controlled by the system
 - The number of desktop computers that are being controlled by the system and the number of desktop computers authorized per license
 - Agreement to keep software installed and operating for a period of five (5) years from the installation date
 - A report from the software showing the energy savings in kilowatt hours for all of the network computers

Network Desktop Power Management Software \$15 per desktop computer

Installation of NDPM software to control energy management settings on desktop computers.
